

Hypothermia & Frostbite

It's important to recognize the signs of Hypothermia and Frostbite, and what you can do in those moments to help your pet.

Risks & Symptoms:

Those most susceptible to hypothermia and frostbite are newborns, seniors, and sick pets. Symptoms for hypothermia to keep an eye out for include shivering, whining, anxiety, lethargy, difficulty breathing, and fixed or dilated pupils. Similarly, symptoms of frostbite can come across as your pet having pale/blue skin due to lack of blood flow, there is ice around the affected area, or the affected area is cold or brittle to the touch.

Prevention:

The best way to prevent hypothermia and frostbite is to not expose your pet to extreme, cold weather for an extended period. Remember, newborns, elderly, or sick pets are incredibly susceptible. Keep them warm and away from drafts as much as possible.

Chill Out!

Discover ways to navigate the winter season with ease. Plus product suggestions you can find in store!

Cold Weather, Your Pets, and You

Winter brings with it all kinds of concerns regarding how the weather will affect you and your family.

Your pet is certainly no exception. Here we will expand on a few tips to ensure a safe season for everyone involved.

Know Limits; Stay! Inside

All pets are different. How your pet reacts to cold weather may not be the same for another. Recognize your pet's needs and adjust them accordingly. Those with long coats are generally more tolerant of cold, while those with short fur (or short legs) will feel the cold that much faster and may require a sweater or jacket for trips outdoors. The idea that some pets are more tolerant to inclement weather than humans is simply untrue. Like you, your pet is susceptible to frostbite and hypothermia if left outside for too long. No pet should be left outdoors for an extended period, especially in below freezing weather.

Check Paws

Cold weather can cause injury and damage to paw pads. It is extremely important to check the paws before and after walks for any signs

of cracking or bleeding. It's also a good idea to cover the paw pads in a protectant like Pet Relief™ Canna Care, or NaturVet® Tender Foot cream. Both products provide moisture to clear/prevent cracks in the skin using natural ingredients. To prevent any ice or salt build-up between toes that can cause irritation and pain, you can trim the hairs with a small scissors. Use a friend if your pet is squirmy!

Our crew cannot stop raving about Pet Relief™ CBD! Canna Care is a cannabinoid infused balm that helps soothe the pain of irritated or inflamed areas on your pet. It's certainly our Top Pick for fast "relief" from any topical ailment! Mention this newsletter to get 10% off your first jar today!

Another tried and true method to protect the paws from the elements are boots. We recommend Protex Pawz®. These rubber booties are reusable, disposable, waterproof, and 100% biodegradable. They stay secure on the foot and allow your pet to maintain sensation with the ground beneath them.

Solutions for Bad Breath

1. **PlaqueOff** – Dehydrated kelp that works with your animals saliva to break down plaque AND tartar! This is our #1 suggestion for simple, long term dental health.
2. **Raw Diet** – Feeding raw, such as Primal, Tuckers, or Instinct will help with dental health. They contain enzymes that help break down plaque and do not contain starches that can lead to plaque build up.
3. **Raw Marrow Bones** – Unlike other bones, raw bones do not contain starches that can contribute to plaque build up and will help scrape off the plaque as well as massage their gums.
4. **Tropiclean** – Water additives help with stinky breath, as well as brushes and toothpaste to use for maintenance.
5. **Merrick Fresh Kisses** – these come in 2 different flavors: Spearmint and Peppermint with Coconut Oil. Coconut oil helps fight gum disease and attacks harmful bacterial! *Dog Treat - Will not work for Cats*

Products work best in conjunction with consistent brushing.

Pooches with Smelly Smooches?

We got you covered! February is Dental Health Awareness and your furry friends breath might tell you more than you realize!

Pictured is Grizzy, a 7 month old Bernedoodle showing off his handsome smile!

Bad Breath: Why Brushing May Not be Enough

Dental Health Awareness Month is not just for humans! Everyone has a dental routine in place, but do you have one for your furry friends?

Brushing your animals teeth can be a daunting task! Depending on the animal, you may need more than one person! However, unless you are brushing at least three times a week, the plaque build up might be greater than what you are brushing away! That is where we come in! We have the knowledge and the options to make sure we find the perfect dental solution for you and your furry friend!

Plaque VS. Tartar

Plaque build up is primarily caused by starches in your animals food and treats. Plaque can be removed with a toothbrush and some build up is generally considered normal.

Tartar is the calcified version of plaque that results when plaque goes untreated. Tartar cannot be removed with just a toothbrush and often will require a vet visit to remove, costing you possibly thousands of dollars!

Why Dental Health is Important

When tartar build up goes untreated, it can cause bad breath, tooth decay, gum disease, and premature tooth loss. Beyond that, it can lead to infections that spread throughout the body and affect the lungs, liver, heart, and kidneys!

According to the American Veterinary Dental Society, more than 80% of dogs and 70% of cats develop gum disease by the time they are three years old!

How to Prevent Becoming a Statistic

One of our most popular dental supplements is PlaqueOff which is dehydrated Norwegian Kelp that you can sprinkle over your animals food daily. It works over time with their saliva to break down plaque AND tartar! For a 50+ lb dog, it costs less than 50 cents a day! If you mention this newsletter while purchasing PlaqueOff in store, you will receive 10% OFF that bottle! We want to help you develop your perfect dental routine, this may be a great place to start!
